European Energy Forum dinner debate
European Parliament, Brussels
9 July 2018
Energy mix for EU28 electricity generation, 2016

Around the world, 38.2% of electricity supply is generated from coal.

Source: Eurostat databases nrg_105a last update 01.02.18
76% of EU fossil fuel consumption is imported, much from Russia.
More wind and solar PV means higher prices

Electricity prices for household consumers H2 2017, €/kWh

- Bulgaria
- Czechia
- EU
- Denmark
- Germany

Share of new RE:
- <10%
- 18.5%
- >25%

9% of European Union citizens live in energy poverty.
Global coal consumption, 2017
million tonnes of coal equivalent (Mtce)

China consumes half of all the coal mined in the world.

China, 2,704
EU-28, 335
India, 606
USA, 474
South Korea, 123
Russia, 132
Japan, 172
South Africa, 117
Indonesia, 82
others, 586

Strategic research agenda for coal R&D

Deliverables: strategic research agenda & network of clean coal technologists.
EURACOAL is an active partner in the Coal Platform’s working groups.
