Emission Trading in Hungary

Requested CO₂-Allokation [Mio. t/a]

EU-Decision of April 16th

- Reduction of the proposed cap by 3,8 Mio. t/a (12,4 %) to 26,9 Mio. t/a
- Allocation methodology for installations is not comprehensible and may include State aid
- Elimination of ex-post regulations
- Allocation guarantees after 2012
- the proposed free allocation for new entries over a 6 year period would be likely to become a subject of a separate State aid investigation

1) total: 31,7 Mio. t/a

2) with a „green power“ generation of 409 GWh (8%)
