Updating Territorial Just Transition Plans: The case of Asturias (Spain)

Prof. Pedro Riesgo Fernández

School of Mining, Energy and Materials Engineering of Oviedo

University of Oviedo
The JTP aims to mobilize investments that will stimulate and reactivate the regional economy and create quality employment that will contribute to fix the population:

Asturias JTP initiatives
concentrating activities with reference projects

- Renewable hydrogen value chain: generation, storage & transport
- Renewable energy value chain and energy storage
- Green industry: more sustainable, digital and environmental

(POTENTIALS RFCS AM PROJECT Funded by the European Union)
Operations envisaged by the JTP

Lower economic reactivation and fixing of population

- Promote individual projects within the above-mentioned initiatives
  - Project 1
  - Project 2

Higher economic reactivation and fixing of population

- Creation of innovation poles and centers using existing infrastructures, such as former coal mines
  - Artificial Intelligence (AI)
  - Agri-food industry
  - Data storage, valorization and cybersecurity
  - Industrial innovation
However, it forgets to...

... propose an initiative that genuinely stimulates the regional economy and makes it easier to maintain employment:

- Virtual Power Plant with geothermal
- Financial privileges
- Green hydrogen & RE storage

Circular economies

Eco-industrial parks

Reducing waste & pollution
Thank you for your attention!!
