

# Clean Coal comes in three stages

## Clean Coal I

Retrofit and new-build in line with state-of-the-art technology, increase in efficiency, reduction of  $\text{SO}_2$ ,  $\text{NO}_x$  and dust

## Clean Coal II

Research and development to increase efficiency to  $> 50\%$

## Clean Coal III

$\text{CO}_2$  Capture and Storage

*Investment in ultra-modern technology*
